Shopping cart integration

Mobile app

Point of sale

Virtual terminal

# OCuSOFT Sees Lower Costs with EBizCharge for SAP B1

## Rob Molina, IT Manager

### What made you switch to EBizCharge?

We moved from another credit card processor to you because you all are saving money on every transaction. It was significant savings... You all worked with us extremely well. Every issue that we ran into during implementation... we'd just call you up. You answered very quickly.

### How has CBS improved your workflow?

Just from an IT perspective, whenever I don't get complaints about a hardware or a software, obviously it's working.

## About EBizCharge

EBizCharge is a flexible payment gateway that integrates to over 50 leading ERPs and shopping carts. Accept payments in your ERP system, power your online store, and upload customer invoices to the online payment portal. EBizCharge also reduces transaction rates, saving your company money every month.
