PP Systems Cuts Fees & Double Data Entry with EBizCharge

"EBizCharge eliminated double entry and kept our order entry [and] shipment process completely within the Epicor screens."

-Andrew Lintz
Director of Engineering

What tasks and goals does EBizCharge help you accomplish?

Credit card processing [is now] integrated with Epicor so no double entry is required. EBizCharge eliminated double entry and kept our order entry [and] shipment process completely within the Epicor screens. Credit card processing and Epicor invoicing occurs automatically at Customer Shipment Entry.

Did you discover any additional benefits upon implementing EBizCharge for Epicor?

The fees charged by EBizCharge are less than the fees charged by our former processor. We save about 10-15%. Also the fee structure is a very simple fixed percentage rather than tiered pricing and different rates for different cards. The requirements for additional credit card information is reduced - we no longer need to record the

About EBizCharge

EBizCharge is a flexible payment gateway that integrates to over 50 leading ERPs and shopping carts. Accept payments in your ERP system, power your online store, and upload customer invoices to the online payment portal. EBizCharge also reduces transaction rates, saving your company money every month.

EPICOR INTERVIEW

security code or even the exact address, just the CC number and expiration is required. And finally, credit cards numbers are safely stored by EBizCharge, both during the duration of the order/shipment cycle, and afterwards for repeat orders.

Would you refer EBizCharge for Epicor to other people?

Yes, we are very happy with EBizCharge as our credit card processor and merchant bank, and with the integration of EBizCharge with Epicor.

We like the implementation of EBizCharge as customizations added into the Epicor database, rather than a standalone software package. We had a very good experience with the EBizCharge implementation engineer who was very knowledgeable, helpful, and prompt.

"The requirements for additional credit card information is reduced—we no longer need to record the security code or even the exact address."
