

Accept payments directly in EkiKart POS

Process payments with EBizCharge inside EkiKart POS, and auto-sync every transaction to QuickBooks Online. Eliminate manual entry, speed up checkout, and end manual reconciliation.

Manage payments and automate your workflow

Accept all payment types

Accept credit, debit, and ACH payments directly in EkiKart

Faster checkout

Process payments instantly at the point of sale and let them automatically update

Offer easy payment options

Offer your customers flexible payment options and automate collections

Automatic sync

Transactions made through EkiKart automatically sync with QuickBooks Online

**Automatically sync transactions
from EkiKart back into QuickBooks**

Why EkiKart users love us

Natively embedded

Our in-house developers built EBizCharge to be natively embedded in EkiKart, so you can accept payments at your POS without leaving.

Simple setup

Connect EBizCharge to EkiKart and start accepting payments instantly, plus watch them automatically sync to QuickBooks—no workflow changes required.

Unlimited Support

Get hands-on help with setup, training, and chargeback management from our in-house team.

Built for point-of-sale payments, with tools to support every step

Payments at POS

Run transactions

Accept payments directly in EkiKart or via EMV card readers

In-person payments

Securely accept chip card payments with EMV devices

Mobile payments

Take payments anywhere and sync back to QuickBooks

Beyond in-person

Email pay

Send secure payment links for fast invoice collection

Customer payment portal

Let customers view and pay invoices anytime

Saved payment methods

Store payment details for faster future transactions

Customer management

Request payment method

Securely collect and manage payment details—no manual entry required

Advanced security

Protect data with tokenization, encryption, and secure off-site storage to reduce liability

Custom reporting

Track payments with built-in or custom reporting
