

Integrated payments for Epic & MyChart

EBizCharge lets healthcare organizations accept credit and debit payments in Epic, and enable patient self-pay through MyChart.

Merchant services

Supports all transaction types native to Epic and MyChart

Advanced security

Lock-down security of payment data with PCI compliance and offsite data storage

Built for Epic + MyChart

Run transactions inside Epic, or let customers pay inside MyChart

24/7, in-house support

Enjoy complimentary, unlimited, US-based support with short wait times

Improved cashflow

Faster payment collection by offering patients convenient payment options

Better patient experience

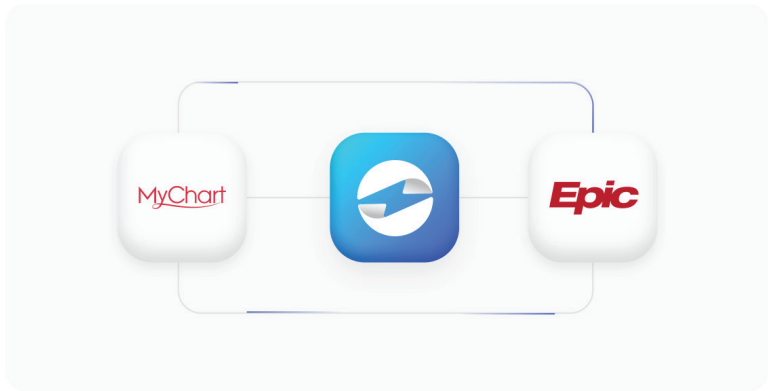

Fewer billing calls, faster collections, and happier patients

EBizCharge is trusted by the healthcare industry for 15+ years.

Payment features built for healthcare

EBizCharge provides a comprehensive suite of payment tools designed to streamline and expedite your patients payments. Tailor your collection process to your preferences, utilizing the tools that suit your needs. All payment features come completely complimentary with a merchant account and subsequent software integration.

Why MyChart users choose us

Dedicated account managers

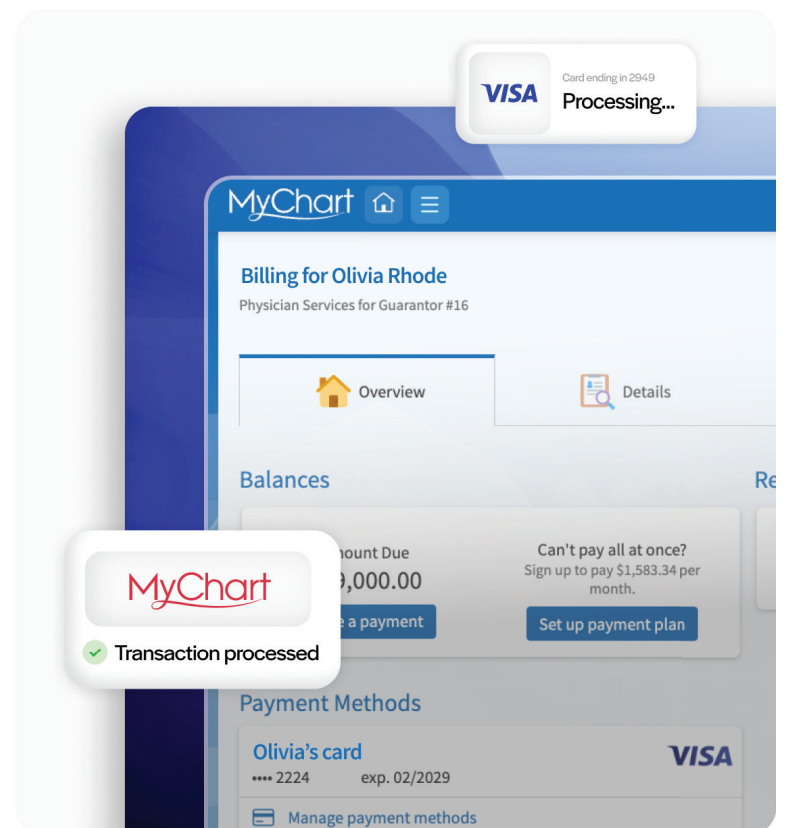

US-based support team with no offshore call centers. When you call, you talk to someone who knows your account.

Privately-owned

No private equity pressure to cut corners. We invest in long-term relationships, not quarterly earnings.

On-site developers

Our MyChart integration is built and maintained by in-house developers – no third-party delays when you need customizations or fixes.
