### Capture payments anywhere

✔ Order desk

✔ Accounts receivable

✔ Card processing

# Why PDI Enterprise users love us

## Natively embedded

Our in-house developers built EBizCharge to be natively embedded in PDI Enterprise, so you can run transactions without leaving your system.

## Simple setup

Connect EBizCharge to PDI Enterprise and start accepting payments instantly—no workflow changes required.

## Unlimited Support

Get hands-on help with setup, training, and chargeback management from our in-house team.

## Features to speed up collections and simplify management

### Payment features

#### Run transactions

Accept payments directly in PDI or via EMV card readers

#### Auto-pay & recurring billing

Automate payments with flexible billing schedules

#### Surcharging

Pass payment fees to customers legally onto your customers

#### Email pay

Email secure payment links to your customers for fast invoice collection

#### Mobile payments

Collect payments on the go and sync back to PDI Enterprise in real time

#### Advanced security

Protect data with tokenization, encryption, and secure off-site storage to reduce liability

#### Customer payment portal

Let customers view and pay invoices anytime through a branded, self-service portal

#### In-person terminal

Accept secure in-person payments with EMV card readers

### Customer management

#### Request payment method

Securely collect and manage payment details—no manual entry required

#### Saved payment methods

Save multiple payment methods per customer for faster future transactions

#### Card updater

Automatically notify and update customers saved payment methods when they expire
